- **Identify primary shapes:** Break down the figure into simple shapes?circles, ovals, rectangles, and triangles. For example:

- Head: circle or oval
- Body: rectangle or elongated oval
- Limbs: cylinders or elongated ovals

2. Establish the Head and Facial Features

- **Draw the head shape:** Use an oval or circle as the base.
- **Place guidelines:** Draw a vertical line down the center and a horizontal line across the middle for facial symmetry.
- **Facial features:** Add simple shapes for eyes (small circles or ovals), nose (small triangle or circle), and mouth (curved line), positioning them according to the guidelines.

3. Construct the Body Using Geometric Forms

- **Torso:** Use a rectangle or an elongated oval for the chest and waist, adjusting proportions based on your character?s personality.
- **Limbs:** Draw cylinders or elongated ovals for arms and legs. Use smaller shapes for hands and feet, like mitten shapes or simple blocks.
- **Connect the shapes:** Use light lines to connect the head, torso, and limbs, establishing the overall pose.

4. Refine the Shapes and Add Details

- **Outline the main shapes:** Lightly sketch over your basic shapes to refine the contours, ensuring smooth transitions between parts.
- **Details and accessories:** Add features like hair, clothing, or props using more shapes, maintaining the simplified style.
- **Facial expressions:** Adjust the shapes of eyes, eyebrows, and mouth to convey emotion.

5. Finalize the Drawing

- **Clean lines:** Go over the refined sketch with darker, cleaner lines to define your character.
- **Erase construction lines:** Remove the initial shape guidelines to leave a polished cartoon

character.

- **Add color and shading:** Use vibrant colors and simple shading techniques to bring your character to life.
